

EVERGROW SMART RESTAURANT DIGITAL SOLUTION

Connecting Customers, Ordering, Kitchen, Billing, Inventory, Staff and Business
Insights into One Connected Restaurant Experience

Helping restaurants create better customer experiences, simplify daily operations and
understand their business more clearly.

EVERGROW TECHNOLOGY

From Vision to Digital Success

ABOUT EVERGROW TECHNOLOGY

From Vision to Digital Success

EverGrow Technology is a technology-driven startup focused on helping businesses transform traditional processes into practical, modern and user-friendly digital experiences.

Our focus is not simply on delivering software. We focus on understanding how businesses actually work, identifying operational challenges and creating digital solutions that make everyday work easier, clearer and more efficient.

APPROACH

DIGITAL-FIRST

Technology-driven solutions focused on practical digital transformation that improves daily operations.

- Built for real-world teams
- Designed for practical business use
- Focused on faster adoption
- Clear ownership and workflows

RELIABILITY

TRUSTABLE DELIVERY

Reliable and intuitive solutions designed around the way teams actually work.

- Intuitive for everyday use
- Clear and easy to understand
- Designed for continuous improvement
- Focused on long-term usability

CORE PLATFORMS

Customized digital solutions, automation and business insights designed to work together as one connected operating layer.

Design

Develop

Automate

Improve

THE RESTAURANT PROBLEM

Running a Restaurant Is More Than Serving Food

A successful restaurant has many moving parts. When these activities are handled separately, problems start appearing.

CUSTOMER CHALLENGES

- Difficult menu discovery
- Limited online presence
- Outdated menu information
- Slow ordering experience
- Poor order visibility
- Limited feedback opportunities

STAFF CHALLENGES

- Repetitive order taking
- Manual writing
- Repeating information
- Difficult table coordination
- Peak-hour pressure
- Communication problems

KITCHEN CHALLENGES

- Unclear order queues
- Missing customization details
- Order delays
- Communication dependency
- Difficulty managing peak demand

OWNER CHALLENGES

- Scattered information
- Limited sales visibility
- Difficult inventory tracking
- Unknown food wastage
- Staff planning challenges
- Limited customer understanding

THE CORE PROBLEM:

The problem is not simply a lack of technology. The problem is **disconnected restaurant operations**.

DISCONNECTED OPERATIONS IMPACT

One Customer Order Can Create Many Information Gaps

Imagine a customer ordering **Paneer Tikka**. The journey looks simple on paper, but disconnected systems create severe friction:

TODAY'S SALES

₹84,250

Sales tell you what happened, but fail to show context.

CRITICAL UNANSWERED QUESTIONS

- Which dishes performed best?
- Which tables were busiest?
- Which hours were most demanding?
- Which orders were delayed?
- How much food was wasted?
- Where was the kitchen overloaded?
- Which customers may return?
- Which operational problem caused the delay?

THE DIFFERENCE:

Sales tell you *what* happened. Connected information helps you understand *why* it happened.

THE EVERGROW SOLUTION

One Connected Restaurant Experience

EverGrow brings the major parts of the restaurant journey together around three connected areas:

1. CUSTOMER

- Discover restaurant
- Explore menu
- Order online & table
- Customize & Pay
- Provide feedback

2. OPERATIONS

- Manage orders & tables
- Kitchen activity
- Staff workflows
- Billing & Payments
- Inventory tracking

3. VISIBILITY

- Sales & Order analytics
- Food performance
- Staff workload
- Inventory health
- Marketing activity

THE 8 CORE PILLARS

01 — Website & Online Ordering

Build a digital front door for customers outside.

02 — Smart QR Dine-In Ordering

Connect seated table customers seamlessly.

03 — Kitchen & Staff Efficiency

Reduce repetitive communication & order errors.

04 — Billing & Payments

Make collections transparent & automated.

05 — Inventory, Food Cost & Waste

Understand purchasing, usage, and waste.

06 — Workforce Management

Understand workload & plan shifts better.

07 — Business Insights Dashboard

Single clear view for total ownership control.

08 — Digital Marketing Engagement

Attract customers and encourage repeat visits.

RESTAURANT WEBSITE & ONLINE ORDERING

Your Restaurant's Digital Front Door

THE PROBLEM

Customers struggle to find complete, updated info (Menu, Prices, Food images, Offers, Location, Timings). Restaurants depend heavily on 3rd-party platforms with high commissions.

EVERGROW SOLUTION

A restaurant-owned digital portal where customers easily explore items, chef specials, offers, reviews, location, and place direct online orders.

CUSTOMER FLOW DIAGRAM

1. Discover

2. Explore

3. Select

4. Cart

5. Order

6. Confirmation

THE EXPERIENCE & BENEFIT

A customer searches for the restaurant, visits the site, explores dishes with vibrant visuals, adds items to cart, and places an order directly. The restaurant receives the order instantly.

KEY BENEFIT: Your website becomes your independent digital front door, giving customers a convenient way to discover, understand, and order directly.

SMART QR DINE-IN ORDERING

Turn Every Table Into a Connected Ordering Experience

Traditional dine-in forces customers to wait for staff to approach, write, and confirm orders—creating peak-hour pressure.

CUSTOMER & RESTAURANT DUAL JOURNEY

EXAMPLE DINE-IN TICKET

TABLE: F02 — Family Section
ORDER: Paneer Tikka × 2, Butter Naan × 4, Dal Tadka × 1
INSTRUCTION: Less Spicy

STAFF ROLE EVOLUTION

OLD FOCUS: Taking repetitive orders
BETTER FOCUS: Serving customers + Hospitality + Assistance

IMPORTANT & BENEFIT: QR ordering does not mean removing restaurant staff. It reduces repetitive order-taking work while allowing staff to focus more on hospitality.

KITCHEN & STAFF EFFICIENCY

From Repetitive Communication to Clearer Coordination

THE PROBLEM: Verbal communication and handwritten orders cause misunderstood items, missing customization, delays, and peak-hour chaos.

OPERATIONAL ORDER JOURNEY

KEY MESSAGE: Less repetitive communication. More time for actual customer service. EverGrow is designed to support restaurant employees, not replace them.

BILLING & PAYMENTS

Make Every Collection Easier to Understand

Restaurant revenue comes from multiple channels (Dine-in, Takeaway, Website, Delivery). Handling them separately makes understanding daily collections difficult.

EXAMPLE — DAILY COLLECTION BREAKDOWN

CHANNEL	COLLECTION (₹)	STATUS / MODE
Dine-in	₹52,000	Cash / Card / UPI
Takeaway	₹12,000	Counter Collection
Website Direct	₹18,000	Online Payment Gateway
Delivery Platforms	₹16,000	Settled Online
TOTAL COLLECTION	₹98,000	All Channels Unified

BILLING INCLUDES

- Restaurant bills & receipts
- Discounts & promotional offers
- Payment mode breakdowns
- Daily & channel-wise collections

OWNER VISIBILITY

Instantly know: Where did today's money come from? How much from dine-in vs online? Which payment modes were heavily used?

BENEFIT: Know where the restaurant's money is coming from and keep transactions transparent and easy to reconcile.

INVENTORY, FOOD COST & WASTE

“How Much Am I Buying, Using and Wasting?”

Inventory is not only about knowing available stock—it is about understanding where food-related money is going.

THE INVENTORY JOURNEY

FINANCIAL EXAMPLE BREAKDOWN

PURCHASED ₹50,000	USED ₹38,000	WASTED ₹7,000	REMAINING ₹5,000
---	------------------------------------	-------------------------------------	--

INVESTIGATING WASTE (Why did ₹7,000 become waste?):
Over-preparation • Low-demand dishes • Spoilage • Excess purchasing • Poor portion control • Unused ingredients • Prep mistakes

BENEFIT: Connect orders with ingredient usage to pinpoint waste and protect food margins.

STAFF & WORKFORCE MANAGEMENT

The Right People at the Right Time

Demand changes drastically between a quiet afternoon and a busy Saturday evening. Staffing must adapt dynamically.

SATURDAY PEAK ANALYSIS (8 PM – 10 PM)

ORDERS SPIKE
+60%

PREP TIME CHANGES
18 min → 31 min

MANAGEMENT WORKFLOW

POSSIBLE ACTIONS & BENEFIT

Adjust shifts • Improve preparation • Add staff during peak periods • Reorganize sections • Review high-demand dishes • Improve kitchen coordination

BENEFIT: Make staffing and operational decisions using actual restaurant activity data instead of guesswork.

BUSINESS INSIGHTS & OWNER DASHBOARD

One Clear View of the Restaurant

The owner should not have to ask different people for every piece of information.

REAL-TIME DASHBOARD SNAPSHOT

TODAY'S REVENUE

₹84,250

TOTAL ORDERS

326

OCCUPIED TABLES

26 / 40

AVG BILL VALUE

₹258

PENDING ORDERS

SALES & FOOD INSIGHTS

- Daily, weekly, monthly sales
- Channel-wise collections
- Best sellers & low sellers
- Popular categories & trends

OPERATIONS & CUSTOMERS

- Table occupancy & section activity
- Peak hours & prep delays
- New vs returning customers
- Customer reviews & feedback

OWNER VALUE: Instant complete clarity across the entire business in one single dashboard view.

DIGITAL MARKETING & CUSTOMER ENGAGEMENT

Getting Customers Is Only the Beginning

A restaurant can have excellent food and still struggle with visibility. The challenge is giving customers reasons to remember and return.

EVERGROW CUSTOMER ENGAGEMENT JOURNEY

THE RECURRING BUSINESS CYCLE

COMPLETE CUSTOMER JOURNEY

From First Discovery to Repeat Visit

01 — BEFORE THE VISIT

Discover (Google/Social/Referral) → Explore (Menu/Photos/Reviews) → Trust (Hygiene/Ratings)

02 — ORDERING EXPERIENCE

Menu Selection → Select Items → Customize Instructions → Submit Order

03 — RESTAURANT EXPERIENCE

Kitchen Receives → Prepare Food → Serve Table → Customer Enjoys

04 — AFTER ORDER & PAYMENT

Generate Bill → Digital Payment → Digital Receipt → Customer Feedback

05 — LONG-TERM RELATIONSHIP

Remember Brand → Return Visit → Recommend to Friends & Family

KEY IDEA: Every single customer interaction is an opportunity to create a better experience and build long-term brand loyalty.

COMPLETE RESTAURANT OPERATIONS

One Order Can Connect the Entire Restaurant Journey

Consider what happens after a customer places a single order:

1. **CUSTOMER** places an order.
- 2. **ORDER SYSTEM** receives & routes ticket.
- 3. **KITCHEN** prepares food based on instructions.
- 4. **SERVICE STAFF** delivers food to correct table.
- 5. **BILLING** compiles bill automatically.
- 6. **PAYMENT** completed via digital payment gateway / cash.
- 7. **INVENTORY** deducts raw ingredient stock.
- 8. **BUSINESS INFO** updates revenue and sales metrics.
- 9. **OWNER DASHBOARD** displays complete activity in real time.
- 10. **DECISION** owner identifies improvement opportunities.

WHAT ONE SINGLE ORDER REVEALS

REVENUE: How much sold?

FOOD: Which dish?

TABLE: Where placed?

KITCHEN: Prep time?

STAFF: Workload created?

INVENTORY: Ingredients used?

CUSTOMER: Preferences?

BUSINESS: Macro trends?

KEY MESSAGE: Integration makes each activity more useful because data is part of the larger business journey.

BENEFITS FOR EVERYONE

One Solution. Different Benefits.

FOR CUSTOMERS

- Easier discovery & menu viewing
- Frictionless table ordering
- Customized instructions
- Convenient payment & receipts
- Feedback opportunities

FOR STAFF

- Less manual order writing
- Clearer order tickets & status
- Better kitchen coordination
- Easier table identification
- Less rush pressure

FOR OWNERS

- Complete sales & operations view
- Inventory & waste control
- Staff workload understanding
- Customer insights & marketing

FOR THE BUSINESS

- Stronger digital presence
- Reduced manual errors
- Smooth information flow
- Data-backed continuous growth

THE GOAL:

Not more software. Not more complexity.
Better visibility. Better coordination. Better experiences.

HOW EVERYTHING WORKS TOGETHER

One Connected Business Ecosystem

This is not about using eight unrelated tools. The goal is connecting all parts of the restaurant journey into three core layers:

THE OWNER'S VIEW

What Does the Owner Actually Want to Know?

An owner does not want dozens of confusing screens. The owner wants clear answers to crucial business questions:

DOMAIN	OWNER'S KEY QUESTION
SALES	How much did we sell today across all channels?
CUSTOMERS	Who is ordering from us and are customers coming back?
FOOD	What is selling, what is lagging, and what is most profitable?
TABLES	When are we busiest and how fast are tables turning?
STAFF	Where is my team under pressure during rush hours?
INVENTORY	What are we buying, using, and wasting?
OPERATIONS	Where are kitchen delays happening and why?
MARKETING	How are customers discovering us online?

EVERGROW SOLUTION: Brings these answers into one clear business view to answer: *What happened? Why did it happen? Where should we improve? What should we try next?*

REAL-LIFE EXAMPLE

SPICE GARDEN FAMILY RESTAURANT

RESTAURANT PROFILE

40 Tables • 25 Employees • 300–350 Daily Orders • Family Dining

EVENING DINING CHRONICLE

6:30 PM: Customers arrive, restaurant gets busy.
7:15 PM: Tables filling rapidly.
7:30 PM: Family sits at **Table F02**, scans QR code.

INITIAL ORDER (TABLE F02)

Paneer Tikka × 2
Butter Naan × 4
Dal Tadka × 1
Fresh Lime × 2
Instruction: Less Spicy

ADDITIONAL ORDER & BILL

Gulab Jamun × 2

FINAL BILL: ₹1,480
Customer pays digitally, receives e-receipt.

WHAT THE RESTAURANT LEARNED: Customer preferences, item combination, prep time, table turnover speed, revenue, inventory deduction, and customer satisfaction score.

BEFORE VS AFTER EVERGROW

THE SPICE GARDEN TRANSFORMATION

BEFORE EVERGROW

Manual Ordering → Kitchen Communication → Separate Billing
→ Manual Stock Guesswork → Scattered Information → Owner
Asks Multiple People → **Guess-Based Decisions**

AFTER EVERGROW

Digital Ordering → Clear Kitchen Tickets → Unified Billing →
Automated Inventory → Centralized Info → Clear Dashboard →
Data-Backed Decisions

THE REAL DIFFERENCE

BEFORE: Owner knows "We made ₹84,250 today", but struggles to understand why performance changed.
AFTER: Owner sees Revenue, Orders, Popular Dishes, Peak Hours, Table Activity, Prep Times, and Feedback together.

NOTE: EverGrow does not promise guaranteed revenue growth. It reduces manual effort, improves visibility, supports better decisions, and makes the restaurant easier to operate.

THE COMPLETE EVERGROW ECOSYSTEM

From Customer Interaction to Business Improvement

ECOSYSTEM ARCHITECTURE DIAGRAM

THE EVERGROW PHILOSOPHY

Customer creates activity → Restaurant responds → Business learns → Owner understands → Restaurant improves!

FINAL BUSINESS STORY

Technology Should Solve Real Problems

A restaurant does not need technology simply because technology exists. Technology becomes valuable when it solves a real business problem.

CUSTOMERS NEED

Easy Discovery → Easy Ordering → Better Experience →
Convenient Payment → Easy Feedback

STAFF NEED

Clear Workflows → Less Repetitive Work → Better Coordination
→ More Hospitality Time

OWNERS NEED

Complete Visibility → Clear Information → Deep Understanding
→ Better Decisions

BUSINESS NEEDS

Operational Efficiency → High Satisfaction → Digital Presence →
Continuous Improvement

EVERGROW SMART RESTAURANT DIGITAL SOLUTION

Make the restaurant easier for customers to order from, easier for staff to operate, easier for owners to understand, and better positioned to grow.
